JAVIER ORDOÑEZ

Backend & Cloud Software Engineer | AI-Driven Automation

+57 350 783 4094 • xavidev19@gmail.com • Bogotá, Colombia • linkedin.com/in/javier-ordonez-a017b5a0 • github.com/jordonez19

SUMMARY

Full Stack Developer with 5+ years of experience, including 4+ years specializing in backend development with Node.js, TypeScript, Golang and Java, on cloud-native architectures across AWS and GCP. Over the past two years I have focused on AI-driven automation: I integrate large language models (OpenAI, Claude, Amazon Bedrock) into day-to-day work to build agents, bots and intelligent document-processing pipelines, applying prompt engineering and tool calling directly in production. Solid experience designing REST APIs, microservices, serverless architectures and event-driven systems, with strong React/Next.js frontend skills and hands-on work with PostgreSQL, MySQL, MongoDB and DynamoDB. Used to working in international teams under agile methodologies, with C1-level English.

TECHNICAL SKILLS

AI & Automation: OpenAI API, Claude API, Amazon Bedrock, AI Agents, Prompt Engineering, Tool Calling, Cursor

Backend: Node.js, TypeScript, Golang, Java, Spring Boot, Express, Python, Django

Frontend: React, Next.js, TypeScript

Cloud & DevOps: AWS (Lambda, ECS, Fargate, EC2, DynamoDB, S3, Cognito, SES, ECR, CloudWatch, Route 53, KMS, IAM), GCP (Cloud Run, Cloud Functions, Firestore), Terraform, Docker, Infrastructure as Code

Databases: PostgreSQL, MySQL, MongoDB, DynamoDB, Oracle

Tools: Git, Postman, Figma, Adobe XD, WordPress

WORK EXPERIENCE

Ecapture — Bogotá, Colombia (remote)

Software Developer & Cloud Infrastructure — *2026 – Present*

- Integrated Amazon Bedrock and LLMs into automation pipelines and intelligent document processing, using generative AI as part of the daily workflow.
- Built backend services with Golang, Node.js and TypeScript, and scalable REST APIs for document management and process automation.
- Managed AWS infrastructure (ECS, EC2, ECR, S3, IAM, CloudWatch, Route 53, SES, KMS), automating deployments with Terraform and Docker.
- Built secure integrations with enterprise platforms and optimized PostgreSQL for high-performance applications.

Plurall

Software Developer Full Stack — *2025 – 2026*

- Integrated LLM APIs (OpenAI and Claude) for automation and intelligent assistants used daily in financial business processes.
- Built Slack bots and agent-based workflows powered by LLMs, applying prompt engineering and tool calling in production.
- Developed scalable microservices with Node.js for financial products, with serverless architectures on AWS (Lambda, DynamoDB, SQS, SES, API Gateway, Cognito).
- Designed backend architectures based on DDD and Clean Architecture; customized Apache Fineract (Java, Spring Boot, Gradle) for loan-schedule logic.
- Managed cloud infrastructure as code (IaC) with Terraform.

OneCredential — Freelance

Software Developer Full Stack — *2025*

- Designed a modular frontend architecture with Next.js 13 following hexagonal architecture principles, with reusable components and custom hooks.
- Implemented secure authentication, role-based protection and private layouts; integrated KYC flows with Sumsub with real-time verification updates.

Nexos SAS

Software Developer Full Stack *2022 – 2024*

- Built APIs and backend services with Node.js and TypeScript, and implemented integrations between frontend applications and backend services.
- Designed and optimized MySQL databases and SQL queries; built reusable modules and APIs consumed by multiple applications.
- Developed frontend features with React and modern JavaScript; collaborated in agile teams under Scrum methodology.
- Took part in deployments and maintenance of applications on AWS and DigitalOcean.

Junosy Systems

Software Backend Developer *2021 – 2022*

- Built REST APIs and backend services with Node.js, Express and TypeScript; implemented authentication and integrations with MongoDB and PostgreSQL.
- Designed scalable applications following Clean Architecture principles; applied validations, error handling, logging and security best practices.
- Collaborated with frontend teams, took part in agile Scrum teams, and carried out deployments and maintenance on AWS and DigitalOcean.

EDUCATION

Software Engineering **Colombia**

Institución Universitaria de Colombia — Degree awarded / Professional license 2025 *2019 – 2024*

- GPA: 4.4/5. Academic projects covering software design, development and testing, with a focus on web development (Next.js, Django, Docker, SQL/NoSQL).

Web Development Program (800 hours) **Colombia**

Universidad Industrial de Santander — Misión TIC Scholarship, MinTIC *2021*

- Government-sponsored program by Colombia's Ministry of ICT focused on web development, covering Java, JavaScript, Python, MySQL and Oracle.

CERTIFICATIONS & COURSES

- Docker — **Platzi**, Nov. 2024
- Django - REST Framework — **Platzi**, Nov. 2024
- PostgreSQL — **Platzi**, Oct. 2024
- SQL - MySQL — **Platzi**, Sept. 2024
- Linux Professional Certification — **Udemy**, Sept. 2024
- Node.js: REST API with Express.js — **Platzi**

LANGUAGES

- Spanish: Native
- English: C1
